DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4-29-2005 has been entered.

Prior art cited

2. Copeland et al. (US Patent 5,260,872) discloses An automated testing system for the quality testing of production samples of a blood-clot dissolving product having (a) a frame structure having a horizontally disposed support surface; (b) a loading station for the placement of test tubes into a test tube rack; (c) a cooled pipetting station for automated dispensing and mixing of reagents and production samples; (d) a heated bead-drop station for simultaneous addition of a timing bead to each test tube, having a timer for measuring the time to completion of blood-clot dissolution by detecting the movement of each bead to the bottom of each test tube; (e) a robotic apparatus having an arm and pick-up and release device at the end thereof which is movable both vertically and horizontally and is adapted to move said test tube rack and tubes between said stations; and a programmable computer for controlling said dispensing, mixing and moving operations and recording the results of the product being tested.

Allowable Subject Matter

3. Claims 1-5 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

Independent claim 1 contains allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claim 1:

The primary reason for the allowance of claim 1 is the inclusion of the device for examining liquids including serial electrical plug-in connections disposed on said interface module and said exchangeable sensor for connecting said interface module to said exchangeable sensor. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 2-5 are allowed due to their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
